

'Outstanding' Cancer Care at Home

Trinity
Homecare
Supporting life's journeys

Dealing with cancer can be one of the most difficult journeys that life throws at us. Cancer is a physically and emotionally exhausting illness for patients and their families.

At Trinity Homecare we have been supporting cancer patients in their own homes for over 25 years. Our wealth of experience and award-winning services enable us to provide the highest standards of cancer care across England.

Our cancer care at home service provides much-needed relief to the patients and their family caregivers during these difficult times. We provide practical and emotional support enabling our clients to live supported, fulfilled lives in the environment they know and love.

Types of Cancer Care

We offer cancer care as part of our primary services, which are all fully managed but suited to different lifestyles. At Trinity Homecare, we are committed to supporting individuals with cancer to live fulfilling and comfortable lives at home. Offering both visiting care and live-in care across the UK, we provide heartfelt cancer care for those who need it the most. Different types of cancer care we offer include:

Visiting care

Whether you need a short weekly visit or someone to help you multiple times every day, our visiting care services are completely tailored to your needs.

Visiting care allows you to stay at home whilst carers support you with tasks like bathing, dressing, taking medication and helping around the house. We can also help with your daily routine, taking you to medical appointments, popping to the shops, cooking your dinner and looking after your beloved pets. Whatever level of care and attention you require, our heartfelt team of carers is here to provide for you.

Live in care

A professionally trained carer lives with you in your home to provide full-time care whenever you need it. Live-in care is a welcome alternative to residential care and usually includes personal care, supervision of medication, helping with jobs around the house, cleaning, cooking and companionship. We carefully match a carer who will suit your personality and lifestyle so you develop a personal bond, you will be able to see the carer profile and decide if you'd like to proceed with that carer.

Respite care

In-home respite care services help transfer care responsibilities in times of need. Typically, this is to cover for loved ones, relatives or professional care assistants that require time away from their clients. Find true peace of mind through Trinity's in-home respite care services, allowing your loved one to stay in the comfort of their home with all their needs taken care of. In urgent situations, we also offer emergency respite care.

Palliative care

Our palliative care service is suited for anyone living with a terminal illness or a very complex condition. Support from Trinity Homecare ensures that you or your loved one receives heartfelt and compassionate care to support your overall well-being. Carers offer emotional support as well as practical care such as assistance with personal care, household tasks and medication.

What does cancer care include?

At Trinity Homecare, we respect that everyone has different requirements. That's why we offer bespoke services, tailored to suit individual needs and wishes. Our free no-obligation enquiry service includes a thorough at-home assessment carried out by our expert care team. We work with you and your family, as well as other health professionals involved in your care, to develop a personalised cancer care plan that is just right for you.

Our highly personalised and flexible cancer care at-home service includes:

- Full at-home assessment before care starts
- Access to clinical expertise and medical support available 24 hours a day, 7 days a week
- A bespoke and flexible care plan developed in collaboration with the family and other healthcare professionals
- Our Matchcare Program, allows us to carefully select a carer who will suit your clinical needs, personality and lifestyle
- A dedicated care team led by an expert regional care manager with regular reviews enables us to respond efficiently to changing needs
- Help with personal care (washing, dressing, etc), meal planning and preparation, household tasks and social activities
- Mobility support to assist in moving around the home safely
- Companionship, friendship and reassurance

Cost of cancer care

The cost of care can be a big worry for those considering cancer care services. The care costs for a cancer patient at home are typically higher, as it is a specialist care-at-home service. However, each situation is different and it is important to know that live-in care costs can sometimes be less than visiting care depending on the number and frequency of visits to your home.

Cancer care at home is typically in line with, and sometimes less than, residential care but with the added benefit of receiving one-to-one tailored care, in the comfort of one's own home.

At Trinity Homecare we treat each client as an individual, preparing a tailored care plan to suit each situation. We offer a free no-obligation enquiry and assessment service. Meaning that you can explore our services, get a thorough assessment and a clear indication of costs and care, without any pressure to commit.

In some areas of the U.K. you may be eligible for grants or funding to support your cancer care. Macmillan Cancer Support, Charis Grants Ltd and Turn2us are just some of the organisations that may be able to help you with accessing grants.

Talk to us today

At Trinity Homecare, our ultimate goal is to enrich your lifestyle in the comfort and familiarity of your own home. This allows you to live the independent lifestyle that you love without the daunting thought of moving into a care home. We are here to support you with various different forms of live-in care.

Support from Trinity Homecare

At Trinity Homecare, we have been providing our high-quality live-in care service trusted by families across England for over 25 years.

Our multi award-winning care is focused on enabling independence and enriching lives, so that people can stay safely and happily in the comfort of their own home and avoid a disruptive move into a care home.

Families benefit from reassurance and peace of mind that their loved one is receiving the very best care provided by a dedicated team of carers.

Here are a few reasons as to why our clients choose Trinity Homecare:

Live-in care rated 'Outstanding'

Our established service is regulated by the Care Quality Commission (CQC) in England and has achieved the highest 'Outstanding' rating for the quality of care we provide. Only 4% of home care companies in England have achieved this rating.

This means that you can be assured that you are receiving the very highest standards of care at home.

A responsive and flexible service

We appreciate that circumstances may mean you need to put care in place quickly. Our expert care team can set up live-in care in as little as 24 hours, sometimes sooner.

We will work with you and your family to ensure you have the right care team in place exactly when you need it.

A trusted homecare service

We know how important trust is when choosing a live in care provider.

Many of our families, who trust us to provide high quality care to their loved ones, have happily shared their experiences of our service on the rate and review websites like homecare.co.uk, giving us a 5 star rating.

Continuity of care

We have a dedicated team of carers some of whom have been working for Trinity for many years. This means they are committed to us, as we are to them which means they stay with us longer.

For families this means that you get continuity and consistency of carers supporting your loved one, minimising disruption to daily life.

Visibility of the care you receive

Our digital platform TrinityConnect enables us to proactively monitor and manage the care we provide. Families can see the care plan, care notes and all records relating to the care provided. These are regularly reviewed and updated by carers and care managers via an app, enabling effective monitoring and control. These insights provide families with a much needed and reassuring window into the care their loved one receives.

Local care teams close to you

Whilst we operate throughout England, our live-in care service is delivered locally to you. Our care management team support carers and families on a regional basis, ensuring the highest levels of monitoring and support, whilst ensuring a personalised approach to care delivery.

A fully managed service

With our fully managed service, you can enjoy peace of mind and a hassle-free care experience. Our dedicated team of carers is supported by experienced Care Managers around the clock, ensuring that you receive the highest quality of care. This means you won't have to worry about managing the carer and arrangements yourself.

Our fully managed service takes this burden away, allowing you to spend quality time with your loved one.
